

Contradictio In "Ex Cathedra"

The problem is simple:

If you measure the age of Jesus in days and "fix" the date of 24.12. in a year for the celebration of the day of birth of Jesus, then the commission of the date of death of Jesus (Good Friday) in a year cannot "dance around".

Simply take a look at the enclosed Excel-Sheet "Easter.xls" and play around with the cell "B6".
